CLASSIFICATION

QES Computers, started by **Lawrence Ling** in 1998, stands for Quality Efficient Service and their mission is to offer clients the highest quality products with the most efficient service possible while maintaining competitive prices.

They have 6-7 employees in the shop who are very busy serving their customers that are mostly small businesses.

QES Computers carries a very broad product line of not only computer products but televisions as well, and is a premium service provider, certified with HP, among others. They have repair services for PCs and printers, do network setups, provide security for your PCs and are committed to customer satisfaction.

Lawrence Ling emphasizes the importance of backing up your hard drive; the most common problem with computers is viruses. QES offers cloud storage and external hard drives for backup, which would allow them to recover your information, should your equipment get corrupted.

They can build custom systems and make sure that all systems are compatible with major components such as Intel, Microsoft and AMD. They only sell what they can support. Lawrence recommends buying quality products, which will be less of a headache for you. The technology is getting better and the laptops lighter and thinner with more features.

Lenovo, the world's largest personal computer vendor, has many new great products, including a desktop computer that is the size of a cracker box, and laptops with touch screens, multi-way screen positioning and are spill-proof.
